ノバスコシア州における変異株の確認

1月22日、ノバスコシア州保健局ラボは、昨年12月に同州で検出されていた新型コロナの2例が、カナダ国立微生物研究所によるサンプル検査によって変異種であったと特定された旨発表しました(1つは英国変異株、1つは南ア変異株)。同政府発表では、いずれの症例もカナダ国外からの旅行関連とのこと。

同政府発表は以下のとおりです。

Four New Cases of COVID-19, <u>Variant Cases Identified</u>, State of Emergency Renewed

January 22, 2021 - 2:20 PM

Nova Scotia Health Authority's labs completed 1,450 Nova Scotia tests on Jan. 21. The lab confirmed today that the National Microbiology Lab identified two variant cases of COVID-19 in Nova Scotia, one UK and one South African variant, tested in December. Both of the cases were related to travel outside of Canada and were reported in Central Zone.

As part of ongoing surveillance, Nova Scotia has been submitting samples to the National Microbiology Laboratory for sequencing since the first wave of the pandemic.
