Canada will get COVID-19 vaccines after other countries due to lack of manufacturing capacity, Trudeau says

Canadians will get COVID-19 vaccines later than people in other countries because of a lack of domestic vaccine manufacturing capacity, Prime Minister Justin Trudeau said on Tuesday. The countries that have domestic pharmaceutical facilities are “obviously going to prioritize helping their citizens first,” Mr. Trudeau said. Amir Attaran, a professor at the University of Ottawa with the School of Public Health and Faculty of Law, said the Prime Minister’s comments are “beyond preposterous” and that while Canada doesn’t have the ability to mass-produce a vaccine, it could make enough for vulnerable populations and health care workers. The different vaccines under development require different technology to produce, and while Canada doesn’t have the equipment needed for all of the possible vaccines, it does have the technology to manufacture the vaccine proposed by AstraZeneca, Prof. Attaran said.

Des millions de Québécois à vacciner

Dans l’attente du plan de match d’Ottawa, l’État québécois se prépare à lancer une vaste campagne de vaccination contre la COVID-19 dès janvier. Comptant déjà sur un réseau expérimenté en la matière, le gouvernement Legault veut néanmoins mettre toutes les chances de son côté et pourrait élargir la liste de professionnels autorisés à injecter des doses. Le ministre de la Santé, Christian Dubé envisage des scénarios d’avoir plus que 200 000 personnes vaccinées par semaine, il a déclaré hier.

Public Advisory: Residents Who Visited Bars in Halifax and Surrounding Metro Communities in Last Two Weeks Asked to Call 811 to Arrange COVID-19 Testing

November 24, 2020

The Department of Health and Community Services is asking people who have returned to Newfoundland and Labrador from Nova Scotia in the last two weeks, and who visited bars in Halifax and surrounding metro communities to call 811 to arrange COVID-19 testing.

Public Health is making this ask out of an abundance of caution and in response to Nova Scotia's announcement today implementing a broad asymptomatic testing strategy. The link to the Government of Nova Scotia's news release is [here](#).

Residents should call 811 whether or not they are experiencing symptoms of COVID-19.
