Près de 10% des cas de COVID-19 à Montréal sont liés au variant britannique

Montréal demeure en zone rouge et compte de 350 à 400 nouveaux cas de contamination chaque jour. La directrice régionale de la santé publique de Montréal, Mylène Drouin, a précisé mercredi que de 8 à 10 % des cas sont liés au variant britannique. La D^{re} Drouin s'attend à ce que le variant britannique gagne du terrain sur la souche actuelle et qu'il devienne prédominant tôt ou tard, puisqu'il est plus contagieux.

Vaccination passports would make sense 'in a digital world,' Dubé says

Quebec is actively studying the idea of issuing digital passports that would give immunized people easier access to certain events, restaurants or even foreign travel in the post-pandemic age.

Four New Cases of COVID-19 in Newfoundland and Labrador, as regions outside Avalon move to Alert Level 4

The risk of community spread in the Avalon region remains high. This means the Avalon region will remain in Alert Level 5. This will be re-evaluated in two weeks.

Public Health continues to advise against travel in and out of the St. John's metro area, except for essential purposes. Public Health has determined that the St. John's metro area outbreak has not resulted in community spread to the rest of the province. This means all areas outside the Avalon region will move to Alert Level 4.

This will be re-evaluated in two weeks.Alert Level 4 goes into effect tonight Saturday, February 27, 2021, at 12:01 a.m.The areas outside the Avalon region include:

- Labrador-Grenfell Health;
- Central Health;
- Western Health; and,
- Zone 4 of Eastern Health, which encompasses the Burin and Bonavista Peninsulas, as well as the Clarenville area, including the Isthmus.
