COVID-19: Santé Canada approuve le vaccin de l'entreprise québécoise Medicago

Le vaccin québécois (*Covifenz* de) Medicago contre la COVID-19 a reçu le feu vert de Santé Canada pour les personnes âgées de 18 à 64 ans, jeudi, après de longs mois d'analyse par le ministère. Produit à partir de plantes, ce vaccin requiert deux doses (3,75 microgrammes par dose) administrées dans une intervalle de 21 jours pour atteindre son plein potentiel de couverture.

COVID-19 Restrictions Easing Next Week, Fully Lifted on March 21

On Monday, February 28, Phase 1 of the Province's reopening plan will be adjusted to end the current requirement to show proof of full vaccination before participating in non-essential, discretionary events and activities. Other restrictions continue.

On Monday, March 7, at 12:01 a.m., Phase 2 will begin with the following restrictions in effect:

During Phase 2, people who test positive for COVID-19 will still be required to self-isolate but they will no longer be required to notify close contacts outside their own household.

At acute-care and long-term care facilities, restrictions on visitation and in other areas will be determined through infection control and occupational health processes at each facility.

At public schools, current restrictions will remain in place until the end of March break.

Phase 3 – the removal of all provincial COVID-19 restrictions, including at schools – will begin March 21. The changes in restrictions will be updated at: <https://novascotia.ca/reopening-plan>
In addition to the changes in restrictions, the last daily news release on COVID-19 data will be issued March 4. It will be replaced by a weekly release.
